Work Experience

Frontend Developer Intern

VAUX (Brisbane, Australia)

Dec 2020 - Feb 2021

Project Technology Demonstration

- Built a custom audio player and waveform visualisation for an audio compression and noise reduction deep learning model, to make it easier to pitch to investors. It was pitched to around 30 Deep Tech Venture Capital firms in Australia, the US, UK and Japan. See more details [here](#).
- Technology stack: HTML/CSS, JavaScript, Wavesurfer.js.

Project Website Revamp

- Restyled the company's landing page to make it more appealing to B2B enterprises. See more details [here](#).
- Technology stack: HTML/CSS, JavaScript, Amazon S3, GitLab CI/CD.

Projects

Portfolio Website

- A website that showcases my frontend skills and provides a guided tour of my work. See it [live](#), or the code [here](#).
- Technology stack: React, Gatsby, styled-components, Netlify.

Quizzical

- A trivia application that tests your general knowledge in various categories. See more details [here](#).
- Technology stack: React, styled-components, Open Trivia Database API, Netlify.
